

Who Should Attend

This program is directed to providers, patients and care-givers. Concurrent educational sessions will be held for hepatologists, gastroenterologists, oncologists, primary care physicians and other health care providers involved in the management of patients with liver cancer.

Program Overview

The goal of this course module is to help clinicians and other service providers understand the management of Hepatocellular Carcinoma in the US population, innovations in therapies and advances in research and development.

Learning Objectives

At course completion, attendees should be able to:

Increase Knowledge

Understand the molecular classification of HCC

Understand the multidisciplinary approach to management of HCC

Competency

Define the mechanisms that lead to the development of hepatocellular cancer (HCC)

Performance

Discuss the available evidence-based data on promising treatment options for advanced HCC

Discuss the advances in research and development

Liver Cancer Conference
